

## What is the HTEC Network?

The HTEC Network is a voluntary organization of manufacturing technology educators who actively network with and leverage the capabilities and technologies of Haas Automation, the Haas Factory Outlets (HFOs) and HTEC Partners to work with local industry, schools at all levels, government and manufacturing associations to exchange the best manufacturing practices and educational methods and to exploit the power of modern manufacturing equipment for educational purposes.

## Who can join & what's the cost?

HTEC Network membership is free and is open to all educators who use any Haas CNC products in their programs. Joining is a simple online process and will allow an educator to list their school & program, along with other information that can promote their program to students, parents & local industry.

## How do I update my HTEC Member Directory profile?

Details on how to update your profile are found on the Members Directory page. Just click on **Click here....** and follow the instructions. The one page of Member Listing Instructions are downloadable. Up-to-date information on your profile is important as it is used by persons who want to know more about your program.

## How do I become an HTEC Partner?

Contact Hope Riska at [hoperiska@haascnc.com](mailto:hoperiska@haascnc.com) or 763-742-1275 to discuss how your technology fits with CNC education and the program you will offer to all HTEC members.

## How do I find out about an HTEC Conference in my state or region?

Annually, 15+ one-day state or regional HTEC CNC Educator Conferences are hosted by an HTEC Member school. Date, location and details are listed 60 to 90 days prior to the event on the Conferences page. These events are free to all machining/manufacturing technology educators at any school level, regardless of types of machines currently in use at that school. A 4-day Annual CNC Educators Training Conference is held each July.

## Is online CNC/CAD/CAM/CMM Learning software available?

Multiple HTEC Partners, listed in the Partner Directory have developed PC-based online training for learning Haas CNC operations & programming. Also additional Partners have online learning available for CAD/CAM and CMM. Detailed information about all of these can be found in the Partner Categories: CNC Accessories, CNC/CAD/CAM Software and CNC/CAD/CAM Training-Teacher Training-Training Services.

## What is the Haas Technical Education Council?

The HTEC Council is the guidance and advisory group of educators who represent the various types of schools in the Network Membership. They are elected according to the By-Laws at the Annual HTEC Conference. Feel free to contact your school-type representative to learn more and further discuss becoming more active in the HTEC Network. Current HTEC Council members are listed on the About Us Page.
